Sec. 66-77 Safety Requirements

The following restrictions apply within the Town of Coventry:

- a) Persons wishing to engage in recreational shooting with **Firearms** or **Air Guns** must be the owner of the property on which the discharge is to occur, be the spouse or lineal descendant of the owner of the property, have on their person the written permission from the owner of the property, or be an invited guest with the owner of the property present. Commented [AT1]: This ordinance is a draft based on preferences expressed by the FS/HRSC. This is not finalized, and all language present within may be subject to change.

Commented [AT2]: A separate definition was given for the sake of clarity, and Air Guns were specifically included on restrictions based on safety but excluded from those where noise may be the central concern

- b) Persons wishing to engage in recreational shooting with **Firearms** or **Air Guns** must do so only with an adequate backstop capable of stopping all projectiles intended to be used. The backstop must be of sufficient depth and strength to contain any projectiles fired or intended to be fired at a range and must be of a sufficient height or size to stop projectiles at any position the shooter intends to use.
- c) Persons wishing to engage in recreational shooting with **Firearms** must do so at a distance of greater than 350ft from any structure or enclosed outdoor space occupied by people or domestic animals, or used for the storage of flammable materials unless they are the owner of such property, the spouse or lineal descendant of the owner of the property, or have on their person the written permission from the owner of the property to do so. A building is considered to be occupied for the purposes of this ordinance unless it appears from a reasonable inspection of the structure to be unoccupied.
- d) Persons wishing to engage in recreational shooting with **Firearms** or **Air Guns** must not shoot across any public roads or public trails.
- e) Persons wishing to engage in recreational shooting with **Firearms** or **Air Guns** must do so at an inanimate target which does not possess any secondary reaction upon being hit by a projectile, including explosions, incineration, or expelling projectiles or shrapnel.
